

David L. Wolff AIA

dwolff@facadegroup.com

David is a Building Enclosure Consultant with over 30 years experience in architecture and construction. He holds a Masters of Architecture from the University of Texas at Austin and has experience with projects worldwide. At The Facade Group, David is responsible for project management, sustainability research, design and code compliance reviews as well as marketing and business development efforts.

Most heavily involved in the technical aspects of building design and construction, David has focused primarily on high performance building envelope systems design and coordination. Project types range from institutional to commercial multi-use, to high-rise residential in climates varying from southern California to London and central Asia.

Throughout his career David has often consulted with other architects on high profile projects such as the Wieden + Kennedy Headquarters and The Brewery Blocks in Portland, the Nike Campus in Beaverton, Oregon and the Tengizchevroil Headquarters in Atyrau, Kazakhstan. He is a licensed architect in Oregon and Washington and a member of the American Institute of Architects (AIA) where he has served on the board of directors for the Portland chapter.
