

THE FACADE GROUP

Eric Hektner

ehektner@facadegroup.com

Eric is a Project Manager with over 30 years of experience in architectural design and curtain wall detailing. At The Facade Group, Eric focuses primarily on coordination and detailing of shop drawings for glazing and dimensional stonework. He has been recognized for his ability to unify design drawings with other project considerations—creating a cohesive detail package.

Eric attended Cal Poly San Luis Obispo, focusing on City and Regional Planning. He has worked on several signature projects including a variety of high rise, residential and commercial projects in the U.S. and overseas. One such project was the World Trade Center, Tower 4 in New York. Eric reviewed hundreds of steel fabrication drawings that eventually became the floor framing pieces throughout the tower. Additionally, he coordinated the structural steel framing members with the curtain wall anchorage components at every floor.

Eric's past experience includes managing a project detail team, working with structural engineers. He participates in design team meetings with Architects, General Contractors and the Owner's representatives. He has met directly with glass and glazing material suppliers and has provided quality assurance and control of mock up installations and testing procedures. Eric has traveled to extrusion factories to witness and approve dry fit assemblies of curtain wall units first hand. These hands-on experiences inform his detailing work and enhance his ability to manage projects.

Noted Projects Include:

- ▶ World Trade Center Towers 1 and 4, New York, NY
- ▶ PBCom Tower, Makati City, Philippines
- ▶ IDX Tower, Seattle, WA
- ▶ John Ross Tower, Portland, OR
- ▶ Lotte World Theme Park and Hotel, Seoul, Korea
- ▶ City Creek Center, Salt Lake City, UT
- ▶ 505 Fifth Avenue, New York, NY
- ▶ Atwater Place, Portland
- ▶ Elliot Tower, Portland
- ▶ Edge Lofts, Portland
- ▶ Electric Building (Aerospace Museum) at Balboa Park, San Diego
